TD Waterhouse's 2010 Economic Outlook

The past year has been one for the economic history books, punctuated by a global recession, unprecedented G20 coordination and levels of fiscal and monetary easing, as well as volatility in capital markets. The U.S. unemployment has surged to 10.2% for only the second time since World War II, and Canada's unemployment could breach 9% in the months ahead. Is the U.S. dollar carry trade replacing the one in Japanese yen, and what are the implications for the Canadian dollar, asset valuations, and commodity prices? Join us for a lively presentation on the implications for interest rates and equity markets in 2010.
