

Member Network Registration Notice Breakfast Briefing - London

LEAN ENTERPRISE: What's in it for you and your organization?

With today's economic challenges, increased competition for shrinking markets and foreign currency swings; companies are under increased pressure to increase productivity, reduce costs and increase sales.

Becoming a Lean Enterprise will help you do that and a lot more. Successful Lean Enterprises are successful because they have incorporated Lean concepts and practices into how they conduct all functions in the business.

Lean Enterprise looks at all of the activities below, from the first contact with a prospect to cashing the cheque in payment of goods and/or services provided. As indicated, all of these activities are inter-related and need to add value or they should not exist.

What are the benefits of being a Lean Enterprise?

Developing and maintaining a Lean Enterprise is a relentless and never ending process. Many organizations have “Done a Lean Project” and are usually disappointed with the results. That’s because they stopped. Lean is not a project it is a change in your culture now and for the future.

Lean is not a cost cutting exercise (not re-engineering). It is a growth opportunity that accumulates the reduced costs and delivers them to the bottom-line through elimination of waste for which the customer does not wish to pay.

Three short term advantages of being a Lean Enterprise:

- 1) Improved Profitability
- 2) Enhanced Cash Flow
- 3) Increased Liquidity

These 3 short term advantages typically start to become evident within 8 to 16 weeks and are sustainable within a Lean Enterprise culture.

Three medium term advantages of being a Lean Enterprise:

- 1) Greater customer satisfaction
- 2) Greater employee satisfaction (and employee retention)
- 3) More customers & more business from existing customers

These 3 medium term advantages should start to become evident within 16 to 24 weeks and are also sustainable with a Lean Enterprise culture.
