### Lean Accounting

Come join us for a fun filled evening of great food, network with other CMAs and learn the benefits of Lean Accounting for your organization!

**Brian Sloan, CMA, MBA** will present "Lean Accounting". Lean is a philosophy that can be applied to any business and to any process. The challenge with Lean is to adapt the philosophy to concrete actions that help our businesses improve quality, cost and delivery of products or services. In our last session, Lean was introduced as a concept. In this session, Brian Sloan will discuss specific applications of Lean in accounting and administrative processes. Examples of 5S in the office and value stream mapping for the office be presented, as well as an accounts payable exercise to determine value added and non-value added activities of the procurement to payment cycle – a process all accountants are very familiar with!
